

Flipp

Flipp is an app that shows you all of the latest grocery flyers. You can compare prices easily. You can make shopping lists, too.

Flipp

1

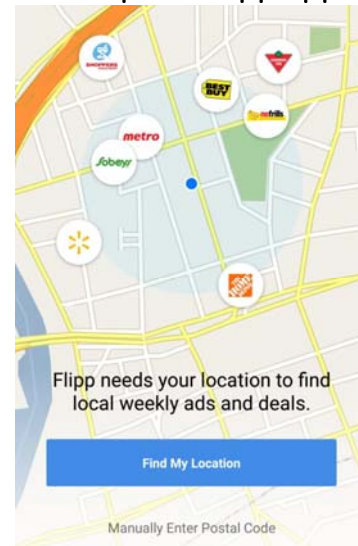

Find the Flipp app

- Ask your adult learner to open the App Store. Tell them to search for the **Flipp** app.
- Ask your adult learner to download **Flipp** to the device
- Once the app is installed, get your adult learner to open the app by tapping the open button.

2

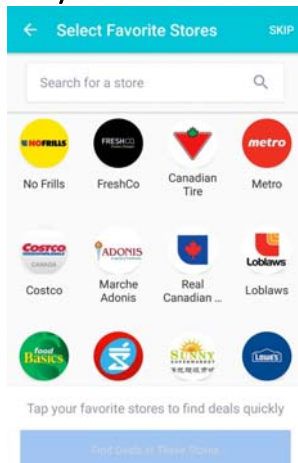

Set-up the Flipp app

- Ask your adult learner to tap on **Find My Location**
- If the device cannot find your location, ask your adult learner to tap **Manually Enter Postal Code**. They should enter their postal code.

3

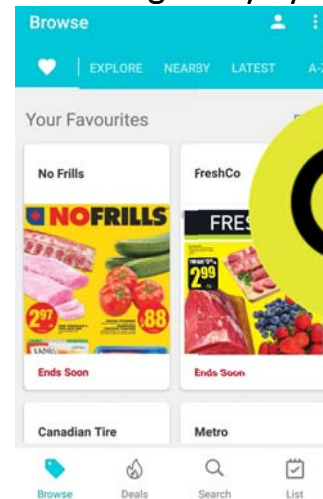

Select your favourite stores

- Explain to your adult learner that Flipp shows them electronic versions of grocery flyers. Using this app will help them see all the deals each week from different stores.
- Ask your adult learner to pick their favourite stores from the list
- Ask your adult learner to tap **Find Deals at These Stores**

4

View a grocery flyer

- Ask your adult learner to open a specific grocery store's flyer. For example, ask them to open the flyer for **No Frills**.
- If No Frills is not in their list of favourites, ask them to tap the Search button. They can type in "No Frills" to find it.

5

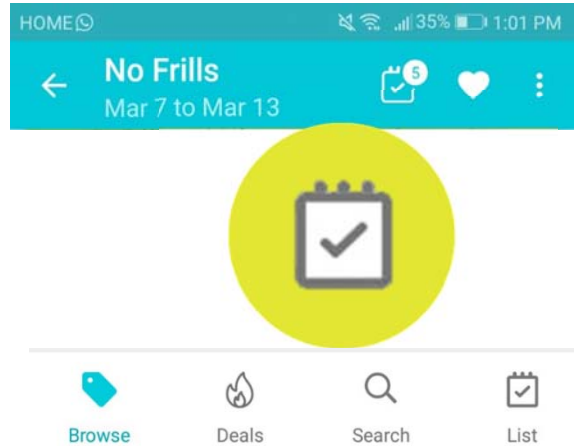

Choose grocery items

- Ask your adult learner to tap on 3 items in the flyer that they would buy
- Explain to them that tapping on items will add a yellow circle around them. This will save the item into a shopping list.

6

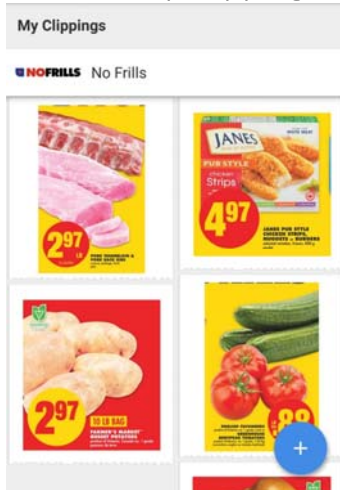

View the shopping list

- Show your adult learner how to tap on **List** to open their shopping list
- Explain that the items they circled in the flyer will show up on their **List**, under **My Clippings**.

7

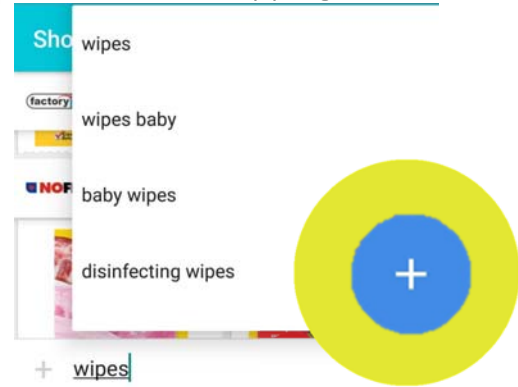

Go to My Clippings

- Show them where to find **My Clippings**
- Explain to them that any item they circle in any flyer will show up here. "My Clippings" is like cutting out parts of a grocery flyer to save for later.
- Ask your adult learner to pick their favourite stores from the list
- Ask your adult learner to tap **Find Deals at These Stores**

8

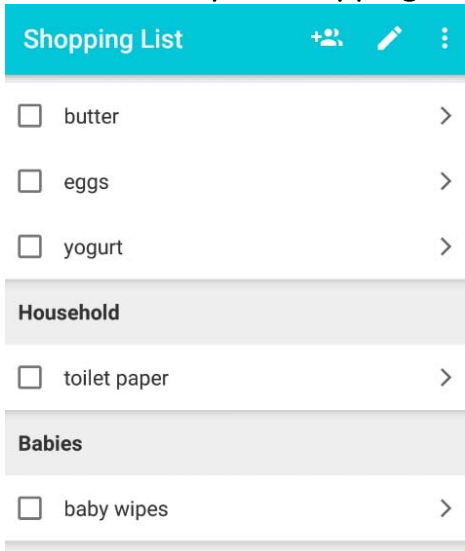

Make a shopping list

- Explain to your adult learner that they can also create shopping lists on Flipp
- Ask your adult learner to press the **Add Item** button. Then they should start typing something they want to buy.
- Explain that they can also choose items from the list that pop up as they start typing
- For example, ask your adult learner to type **wipes**
- Ask them to select **baby wipes**

9

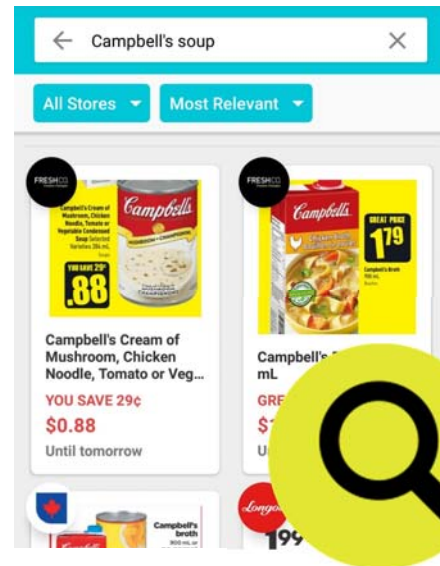

Add items to your shopping list

- Ask your adult learner to add more things to their shopping list:
 - ↳ Eggs
 - ↳ Yogurt
 - ↳ Butter
- Ask your adult learner to tap on **baby wipes** on their shopping list
- Explain that tapping things on their Shopping List will show them if that item is on sale at other stores
- Show your adult learner where they can see when the deal ends. For example, the deal may say “Until Thursday” or “Until Tomorrow”.

10

Search for Items

- Explain to your adult learner that they can also search for any grocery item to see where it is on sale
- Ask your adult learner to tap on the search button on the bottom. Then they should tap on the search bar at the top of the screen.
- For example, ask your adult learner to search for **Campbell's Soup**.
- Ask your adult learner to look at all the Campbell's Soup products that are on sale in different store flyers
